

At **CUProdigy** we provide solutions by fostering **innovation** and **cooperation** with our internal and external clients. **WE** are a Core and Cloud Credit Union Service

Organization (CUSO) headquartered in Salt Lake City, Utah. Built from the ground up by a group of credit union leaders who wish to drive their technological destiny and provide greater options to others like them. Through the years, we've dubbed ourselves Prodigies, differentiating our unique value proposition. What sets **US** apart is our commitment to **collaboration** and **trust**. CUProdigy is currently seeking a **Network Engineer Prodigy** who is made up of a two-to-one ratio of contagious culture and skill. We believe in building a better organization by connecting with remarkable hearts and minds of talented individuals like **YOU**. Are you ready to go beyond remarkable?

Our Network Engineer Prodigy will:

- Collaborate with a great team of helpful and like-minded people designing and implementing infrastructure to improve existing services and provide support to the end user client.
- Design, deploy, maintain, and support our wired and wireless data network, voice systems, firewalls, physical security devices, and VPN.
- Coordinate and implement network software and hardware upgrades; maintain all network enterprise systems in a patched, secure, and stable state.
- Provide Palo Alto Firewall Administration (Security policies, routing, NAT, Panorama, Site-to-site IPSEC tunnels, VPN).
- Administer LAN/WAN security, antivirus, and spam control measures and ensure the overall security of the Network.
- Administer Cisco Nexus 9K and 3K infrastructure in Primary and backup DR Datacenter; working knowledge of Cisco UCS networking architecture.
- Provide Citrix Netscaler (ADC) Administration.
- Administer a growing vCloud Director hosting environment utilizing VMware NSX-T.

Our Network Engineer Prodigy has/can:

- Experience configuring dynamic routing protocols like OSPF, BGP, EIGRP, and IS-IS.
- Monitor Network architecture and troubleshoot any degradation in the network, complete RCAs within 12 hours of incident.
- Strong working knowledge of WAN, BGP topology configuration.

- Configure VMware NSX edge gateways, IPsec tunnels, Firewall rules and NAT.
- Provide Level 3 technical support.
- Perform root cause analysis (RCA) for network issues.
- Troubleshoot issues and coordinate solutions within the cross functional team environment; assisting with special projects as assigned.
- Interface with vendors and team members to troubleshoot hardware and software issues.
- Participate in defining the engineering best practices, focus on scalability, repeatability, and reliability.
- Think critically in high demand environments utilizing strong organizational, analytical and problem solving skills...with a smile.
- Work closely with application support and monitoring teams to support customer-facing escalations.
- Perform complex technical assignments independently, as well as, in large team settings.
- Hands-on experience with how to support repeatable, reliable, and scalable network architectures with fault tolerance, performance tuning, monitoring systems, statistics/metrics collection, and disaster recovery.

Our Network Engineer Prodigy possesses:

- Associate degree in related field required.
- Bachelor's degree in Software Engineering, Computer Science, Information Technologies, Data Processing, or a related field preferred.
- Certified in one or more industry leading certifications such as CCNA, CCNP, PCNSA, PCNSE; CCIE certification is a level-up!
- 6+ years of experience with network engineering, architecture and design in a live production environment. Combined experience should include:
 - 4+ years designing, deploying, and supporting complex networks and/or solution engineering
 - 3+ years network design and support of cloud infrastructure
 - 3+ years scripting or coding experience with one or more languages
 - 6+ years hands-on experience with network engineering
- It's Bonus if you possess experience with Linux, MySQL, or vendor knowledge of Ubuntu, Red Hat, CentOS, Fortinet, Cumulus.
- Fundamental knowledge of TCP/IP networking.
- Experience with providing solutions for hardware technical fixes (printers, sig pads, and cash machines)...you've just gotten your second level-up!

- Experience working in an organization that follows operational best practices including capacity planning, change control, certificate management, server patch management.

Our Commitment to You:

- Contagious Company Culture in a flexible working environment
- Team focused culture committed to innovation and collaboration
- Commitment to professional development and growth opportunities
- Competitive salary and dynamite benefits package; traditional and boutique
- 401k with a 4% company match
- Paid Time Off + Paid Holidays + Paid VTO
- Quarterly Community Giveback Initiatives
- Telework for the right candidate available
