

# Experience Matters

Don't Trust Your Core Processing to Just Anyone

## Expertise is required to ensure your core processing system meets your credit union's needs.

With nearly 30 years in the business of core processing for credit unions, our employees have decades of combined credit union experience.

Prodigy is a CUSO, owned and guided by the credit unions that have a vested interest in creating products the industry wants and needs and who use our core processing platform every day.

### Better for your business

- Prodigy Core is browser-based and hosted in our private cloud. There's never any client software to install or update.
- Our modern, API-driven architecture makes it easy and efficient to deploy the third-party products your credit union wants and needs.
- When we build a new feature, we build it for all our credit unions. We don't double dip by selling expensive add-on modules.
- Our users have complete access to their data. Custom reports are easy, powerful and accessible.

### Better for your operations

- Teller balancing is performed right within our application, with no balance sheets to pull and no totals to transfer. Accuracy is guaranteed.
- Prodigy Core can generate virtually all necessary tax forms – not just the primary three.
- Our streamlined workflows make onboarding new members and onboarding new employees as fast and efficient as possible.
- GL journal entry corrections are simplified. Instead of reversing and reposting the entire transaction, our credit unions can simply edit the original transaction. This makes the process faster and much less prone to mistakes.
- ACH processing is a snap. For example, items can be removed from the ACH return file before it's created, ACH allocations can be skipped, and ACH stop-pays can be performed directly from the member transaction.
- All transactional data is replicated in real time. There's no need to take backups and the system can be restored in minutes, if necessary. It's the ultimate in disaster recovery.

## Don't clown around!

Learn how North Shore FCU future-proofed itself by moving to Prodigy Core.
