

At **CUProdigy** we provide solutions by fostering **innovation** and cooperation with our internal and external clients. **WE** are a Core and Cloud Credit Union Service

Organization (CUSO) headquartered in Salt Lake City, Utah. Built from the ground up by a group of credit union leaders who wish to drive their technological destiny and provide greater options to others like them. Through the years, we've dubbed ourselves Prodigies differentiating our unique value proposition. What sets **US** apart is our commitment to **collaboration** and **trust**. CUProdigy is currently seeking a **Vice President of DevSecOps** who is made up of a two-to-one ratio of contagious culture and skill. We believe in building a better organization by connecting with remarkable hearts and minds of talented individuals like **YOU**. Are you ready to go beyond remarkable?

Our VP of DevSecOps will be responsible for automation of processes within the Development, Security, and Operational (DevSecOps) environment. This role is a combination of leader, proselytizer, technological guru, code ninja, automation engineer and systems administrator, functioning within a SaaS environment. Our ideal candidate will ensure the smooth operations of the Software Development Lifecycle (SDLC) while taking advantage of modern approaches of Agile Development, including; Continuous Integration/Continuous Development (CI/CD) and act as liaison and evangelist between the development, security and infrastructure teams. This individual will manage a team of DevSecOps Engineers and work in tandem with the CEO.

Our VP of DevSecOps will:

- Set a vision and strategic design for how technology will be used in the company and directs the acquisition, management, and implementation of enterprise-wide technology.
- Responsible for running internal technical projects from concept to implementation for Development, Enterprise Applications and Infrastructure.
- Will lead project management initiatives dealing with Windows, UNIX, DevOps, Networks, Databases, Storage & Backups, Security, Application and Cloud technologies.
- Oversee Capital Expenditures and Computing expenses for the company, including budgeting, tracking, and cost containment.
- Recruit, lead and mentor a team of managers and individual contributors who are responsible for deployment, CI/CD of applications on-prem and in the cloud, establishing credibility through leadership, quality technical execution, pitch in with hands-on help, and building a strong engineering culture.
- Handle rapidly developing problems and issues with products and platforms in an effective and efficient manner and address business needs quickly and effectively.

Our VP of DevSecOps is/can:

- Make executive decisions on behalf of the company's technological requirements and ensure that technological resources meet the company's short and long-term needs and then lead all modernization efforts determined to have business value.
- Create timelines for the development and deployment of all technological and security services.
- Effectively translate the needs of the client within the cross functional team environment, acting as the conduit between the layperson and the development team.
- Lead and Manage the DevSecOps team and mentor team members to ensure proper career and personal growth.
- Manage technology budgets, IT Assets, lifecycle programs and time frames.
- Maintain a consumer-focused outlook and aiding in the delivery of IT projects to market.
- Chair the architecture board and set the agenda for:
 - Monitoring and analyzing technology and trends that could improve the company's products and performance.
 - Designing and implement a process to validate assumptions with new technology
 - Designing of modernization efforts that are deemed appropriate
 - Aligning architectural efforts to ensure support of business initiatives
 - Outline the goals and objectives for research and development
 - Set the direction for the hybrid cloud environment and continue to determine best business value for running particular workloads.

Our VP of DevSecOps possesses:

- Bachelor's Degree in Computer Science, Computer Engineering, Information Technology or related field; Masters preferred
- Experience in the FinTech space preferred
- Strong development background is preferred and experience in modernizing applications. Background in Cloud Native architecture, Service Oriented Architecture, Micro-Services and Monolithic architectures.
- 8+ years total experience in application development, including 2+ years in a production 24/7 high consumer traffic Web environment, including Web hosting, security and information protection, load balancing implementations and high availability networks.
- 5+ years of senior or executive level management experience
- 5+ years demonstrated technical leadership experience dealing with Windows, UNIX, Networks, Telecom, Databases, Storage & Backups, and Security.
- 3+ years experience in application development and delivery

Our Commitment to You:

- Track for CTO within 2-5 years depending on hustle
- Contagious Company Culture in a flexible working environment
- Team focused culture committed to innovation and collaboration
- Commitment to professional development and growth opportunities
- Competitive salary and dynamite benefits package; traditional and boutique
- 401k with a 4% company match
- Unlimited PTO Plan + Paid Holidays
- Quarterly Community Giveback Initiatives
- Telework for the right candidate available
